

# Gett.

[www.gett.com](http://www.gett.com)

Gett is one of the leading taxi booking platforms operating in Israel and the United Kingdom. The company specializes in the regulated taxi space offering transportation solutions to B2B and B2C customers, currently serves more than 11,000 B2B clients and has over 800,000 active B2C users across both Israel and the United Kingdom.

## Challenges

- Secure offsite protection for 20TB+ of corporate data
- Slow and unreliable legacy backup solution
- Real-time access to backup data for granular and item level recovery
- Ability to recover large amounts of data in case of a disaster / malicious attack
- Long term data archiving
- Compliance with regional data residency and data protection requirements
- Lack of secure access to backup data for Legal and HR teams
- Limited backup data search capabilities
- Early Ransomware detection and prevention

**Customer Industry**  
Taxi-booking platform

**Customer Size**  
>1,000 emp.

**Customer Location**  
United Kingdom,  
Israel

## Results

“

" Afi provided a secure platform that effectively safeguards more than 20TB of data while maintaining high performance, ensuring quick access to backup data when needed.

”

- “Danny Michael, Global Head of IT”

### Efficient data protection

Afi SaaS backup service safeguards more than 20TB+ of data for Gett, covering 1000+users and over 3,000 drives

### Fast search, access and recoveries

Provides access to 20TB+ of backup in a matter of seconds via UI, with a full-text global search capabilities. Very fast data recovery speed.

### Global search and granular secure data access

A global, tenant-wide search and granular access control for backup and archive data facilitated smooth and secure operations for Legal and HR teams.
